

重現 NodeTree

2013 年我曾經發表了 TiddlyWiki 的 NodeTreePlugin (目前在 GitHub 上還找得到!) (另外我也重新上傳了 TiddlyWiki 檔)

NodeTree

20200916 嘗試：

1. 以 NodeTreeStyles 為底，另存為 conf/nodetree.css

1. 將各個 image 取代為 NodeTreeImages

NodeTree class	備註	取代為 DW 元素
.nt-ti	tree item 樹枝	.nodetree ul > li
.nt-ts	tree separator 枝與枝間的分隔	.nodetree ol > li
.nt-tl	tree list 整個樹狀清單	.nodetree ul
.nt-tp	tree parent  樹狀清單的上層元素	.nodetree div.tp

2. 在 userall.css 中，最前面加上

```
@import "nodetree.css";
```

3. plugin»wrap»noPrefix 裡加上 nodetree

4. 測試：

- 行嗎
- 來棵樹
- 吧

效果沒出來

5. userall.css 改為：

```
1. @import "/dw/conf/nodetree.css";
```

→ 403 Forbidden 😬

```
2. @import "/conf/nodetree.css";
```

→ 404 Not found 😬

6. 放棄 @import，改為直接把 CSS 內容放到 userall.css 中

效果出來了~但最後一項是錯的，原來還有一處是我忽略了，上面取代錯了，要改一下：

NodeTree class	備註	取代為 DW 元素
.nt-ti-last	最後一枝	.nodetree ul > li:last-of-type

ListTree

或是移植 TiddlyWiki 5 的這個 plugin 裡所含的 CSS 好像簡單得多。

測試

1. 直接把這裡面的 stylesheet 複製到 DW userstyle 中，變數都先取代為 2px silver

2. 測試：

```
<div list-tree>
* 是誰太勇敢
* 說喜歡離別
  * 只要今天不要明天
  * 眼睜睜看著愛從指縫
* 中溜走
  * 還說再見

* 不夠時間好好來恨你
  * 終於明白恨人不容易
  * 不願愛得沒有答案結局
</div>
```

結果：

- 是誰太勇敢
- 說喜歡離別
 - 只要今天不要明天
 - 眼睜睜看著愛從指縫
- 中溜走
 - 還說再見
- 不夠時間好好來恨你
 - 終於明白恨人不容易
 - 不願愛得沒有答案結局

初步成功，但有點小 bug 不知是否 DW 產生清單的 HTML 太複雜還是怎樣，下面這段 CSS 的效果：

```
/* top-level: Lines if multiple top elements. No lines if single top
element. */

.list-tree > li:last-of-type:before { display:none; }

.list-tree > li:first-of-type:before { border-top: {!!list-tree-
thickness}} solid {!!list-tree-color}}; }

.list-tree > li:before {
  border-left: {!!list-tree-thickness}} solid {!!list-tree-color}};
  height: 100%;}
```

竟然沒出來

3. 純 HTML 不用 wrap plugin + 英文測試（拿去論壇發問用）：

```
<html><div class="list-tree"></html>
* Starry, starry night
* Paint your palette blue and gray
  * Look out on a summer's day
  * With eyes that know the darkness in my soul
```

```
* Shadows on the hills
* Sketch the trees and daffodils
* Catch the breeze and the winter chills
  * In colors on the snowy linen land

* Now I understand
* What you tried to say to me
  * And how you suffered for your sanity
  * And how you tried to set them free
* They would not listen, they did not know how
* Perhaps they'll listen now
<html></div></html>
```

結果：

- Starry, starry night
- Paint your palette blue and gray
 - Look out on a summer's day
 - With eyes that know the darkness in my soul
- Shadows on the hills
 - Sketch the trees and daffodils
 - Catch the breeze and the winter chills
 - In colors on the snowy linen land
- Now I understand
 - What you tried to say to me
 - And how you suffered for your sanity
 - And how you tried to set them free
 - They would not listen, they did not know how
 - Perhaps they'll listen now

→ [Need help with last mile to port a nice "ListTree" style - DokuWiki User Forum^{1\)}](#)

¹⁾

順帶一提，DW 的新 Flarum 論壇系統超好用的，Markdown 語法的清單語法還支援多行內容及行內 code block 圖片！讚啦！😊
