減少 Google Chrome 記憶體用量

- Chrome太吃記憶體？啟用「分頁捨棄功能」吧 - 電腦王阿達 （原文連結）
  {{url>https://www.kocpc.com.tw/archives/65885}}
  - ↑照做了，不過還是希望可以像 Firefox 一樣，設定成乾脆啟動時就只載入一、兩個分頁，其他的在點選時再載入load on demand
- 似乎蠻寶貴的討論串：How to Make Chrome Not Load Tabs Until They are Selected? - Super User （原文連結）
  - 仍不確定 Chrome 有沒有內建這個功能和 flag
  - 先試 FooTab
    - 有使用者給五★評價

      Michael ElkinModified 2016年1月11日

      > Works great for me. The best part is that the all the pages and addresses still show up but are not loaded until I go to them. I noticed even if I disabled the extension this everything still worked. But comparison others like the GreatSuspender or TabHibernate would destroy any suspended tabs when crashed or closed causing me to looses most of my work.
      > Some tabs still load at startup, but very few. Some tabs do not load when going to them until I refresh but refresh perfectly afterwards. Startup time has greatly improved, with no downsides or issues that I can find.
    - 嗯？好像沒用？重開 Chrome仍然載入全部分頁的樣子
  - 再試 Great Suspender
    - 到底有沒有用啊，為什麼按了 `Suspend other tabs` 好像仍無反應？
    - 哦，自動 suspend 好像有效
    - 不過，真的有節省到記憶體用量嗎？怎麼系統活動監視器的記憶體清單裡面仍然很多 `Google Chrome Helper`
      ↑[20171003] 後來從使用 Vivaldi 經驗中瞭解到extension 也都會產生獨立的程式，裝越多用越多記憶體 怪不得 Chrome 變成記憶體怪獸

Google Chrome, 記憶體
